PLATEAU SKEW-001

DIMENSIONS

84"l x 24"w x 15"h

MATERIALS

1.5" thick slabs of certified renewable cellulose fiber and resin, stainless steel pan

DESCRIPTION

Designed by DESU Design to be a sculptural form of intersecting planes, the Skew-001 draws inspiration from geological rock formations and also suggests movement. The piece can be used as a bench or low table, indoors or out, and is even durable enough to be used in public spaces.
